

# Citrus Nutrition Seminar (1) Introduction

**By Steven Falivene (NSW Department of Primary Industries)**

**Good consistent yields of optimum sized fruit (not the largest) provide the greatest economic returns from health vigorous trees**

- 
- **Healthy vigorous trees**

# **–Irrigation**

- **Nutrition**
- **Pruning**
- **Soil/root health**
- **etc**

## Seminar Aim

- Provide you with the technical understanding, skills and knowledge to make better nutrient management decisions
  - Recognise that nutrition management is not a simple universal recipe, but a journey of discovering what program best fits the blocks needs

# Seminar Topics:

1. Introduction
2. Major and minor nutrients of citrus
  - Fruit quality & yield effects
  - Leaf nutrient symptoms
3. Foliar sprays
4. Soil uptake and nutrient antagonism / synergism
5. Nutrition monitoring techniques
6. How to interpret leaf analysis
7. Fertiliser types
8. Nutrient rates & timing
9. Preparing a fertiliser application amount & timing plan
