

# Foresight

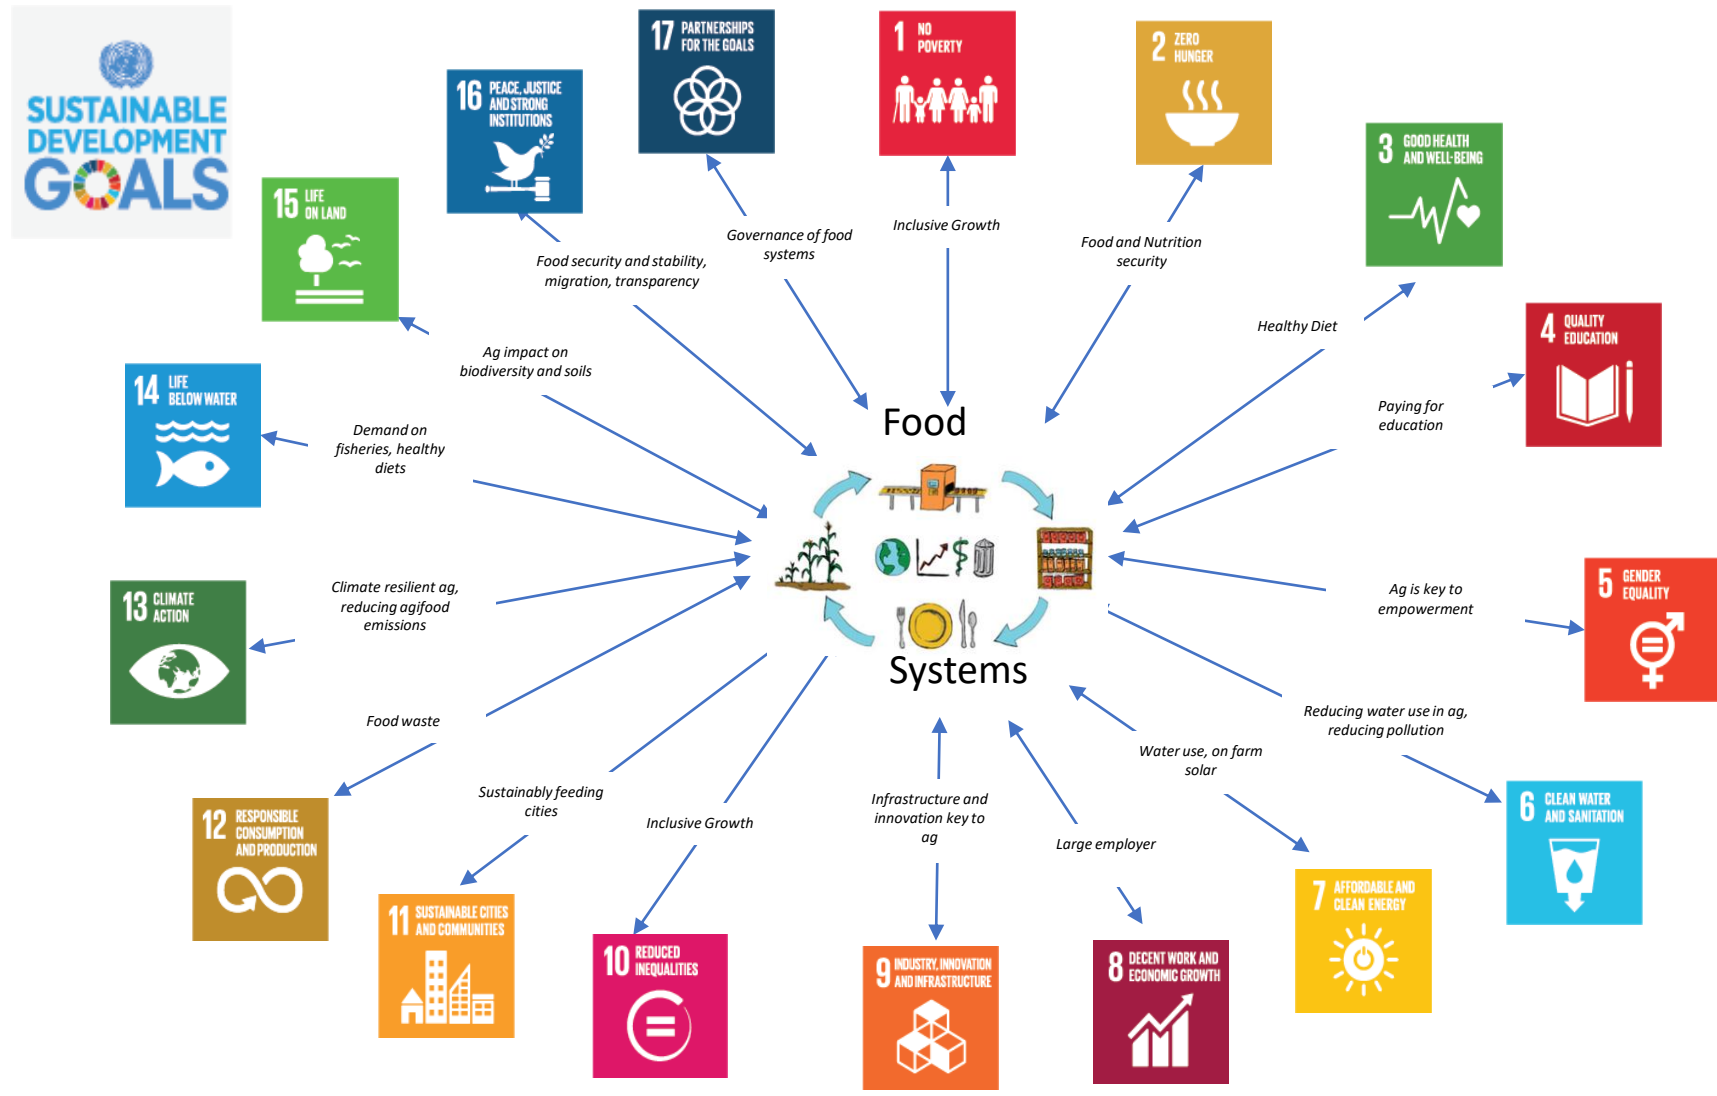

# Basic Definitions of Foresight and Scenarios

***Foresight:*** the ability to judge correctly what is going to happen in the future and plan your actions based on this knowledge  
(Cambridge dictionary)

***Scenarios:*** “Thinking through [scenario] stories, and talking in depth about their implications, brings each person’s unspoken assumptions about the future to the surface. Scenarios are thus the most powerful vehicles I know for challenging our ‘mental models’ about the world and lifting the ‘blindness’ that limit our creativity and resourcefulness.”

Peter Schwartz, *The Art of the Long View: Planning for the Future in an Uncertain World*

## Changes in Agricultural Production in 2050

FIGURE 2.1  
CHANGES IN AGRICULTURAL PRODUCTION IN 2050: CLIMATE CHANGE RELATIVE TO THE BASELINE

Compared with the baseline, climate change is expected to result in declines in agricultural production in large parts of Africa, the Middle East and South and Southeast Asia. These declines are projected to be more pronounced in West Africa and India, where production could decrease by 2.9 and 2.6 percent respectively due to climate change impacts

NOTE: The final boundary between the Republic of the Sudan and the Republic of South Sudan has not yet been determined. Final status of the Abyei area has not yet been determined.

SOURCE: Based on data provided by Wageningen Economic Research. 2018. Climate Change and Global Market Integration: Implications for global economic activities, agricultural commodities and food security. SOCO 2018 Background Paper, Rome, FAO.

# Looking ahead – conflict and food prices

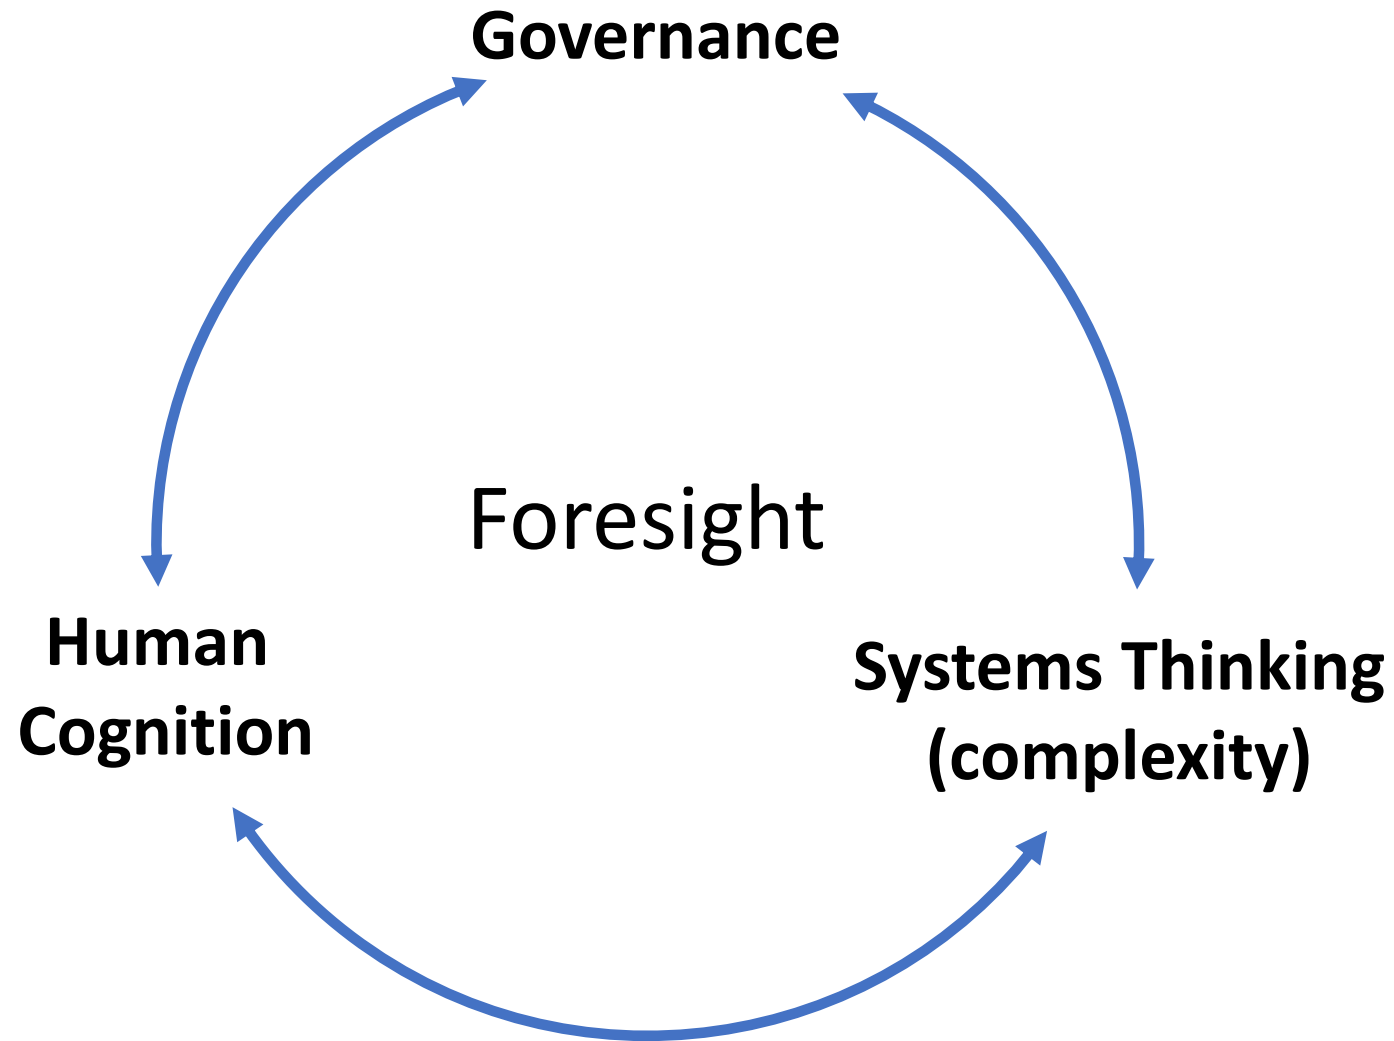

FIG. 1: Time dependence of FAO Food Price Index from January 2004 to May 2011. Red dashed vertical lines correspond to beginning dates of “food riots” and protests associated with the major recent unrest in North Africa and the Middle East. The overall death toll is reported in parentheses [26–55]. Blue vertical line indicates the date, December 13, 2010, on which we submitted a report to the U.S. government, warning of the link between food prices, social unrest and political instability [56]. Inset shows FAO Food Price Index from 1990 to 2011.

# Some Resources For Getting Started

# Foresight – A systems approach to change

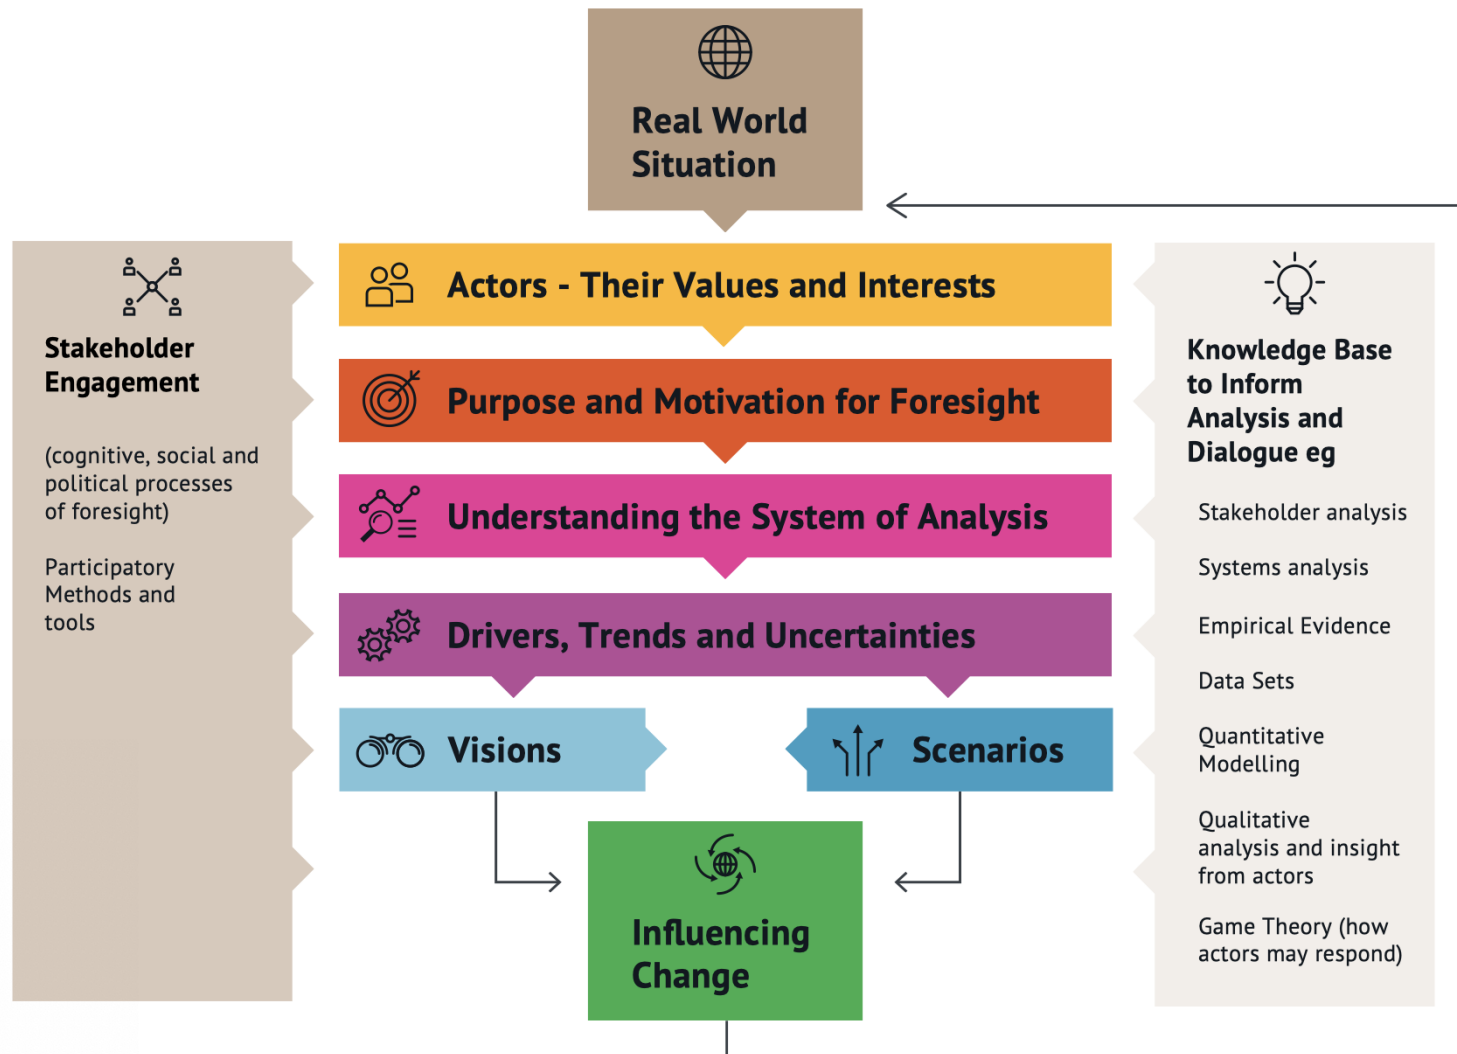

# Time Frame, Focus an Scale

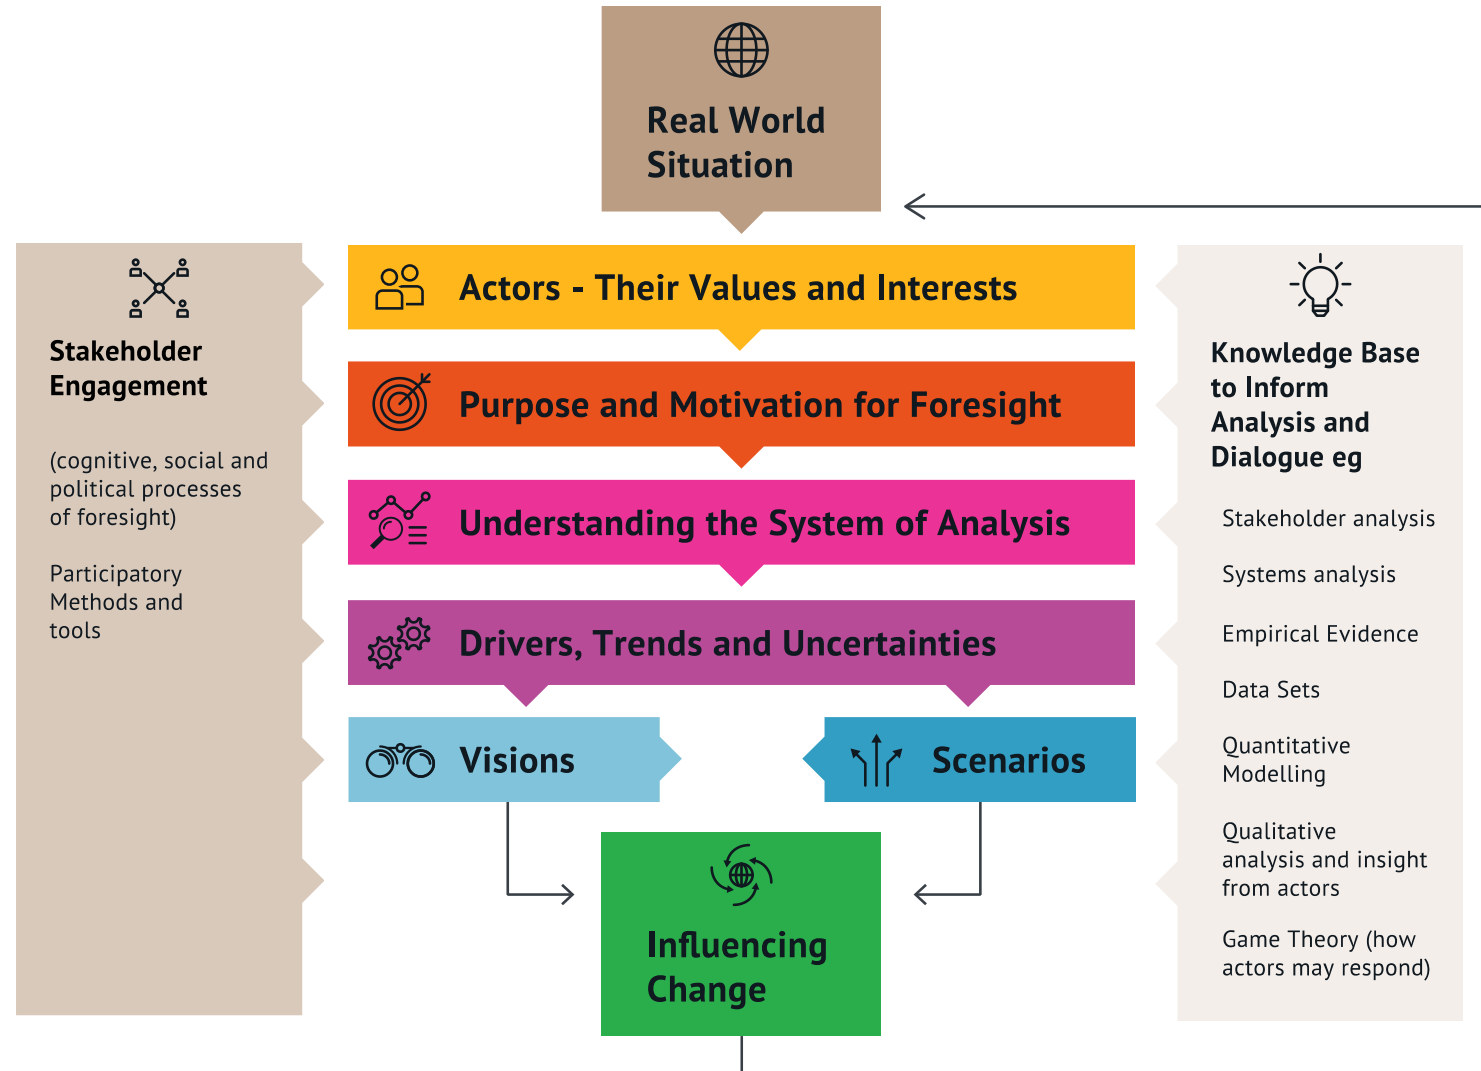

- 5 – 50 years perspective – but to understand implications for action now
- Agriculture and food systems in context of food, water and energy nexus
- Scale

# Foresight Framework

# Framework for Understanding Foresight

# Challenges of perceiving and anticipating the future

**Human Perception  
and Understanding**

**Methodology**

**Values**

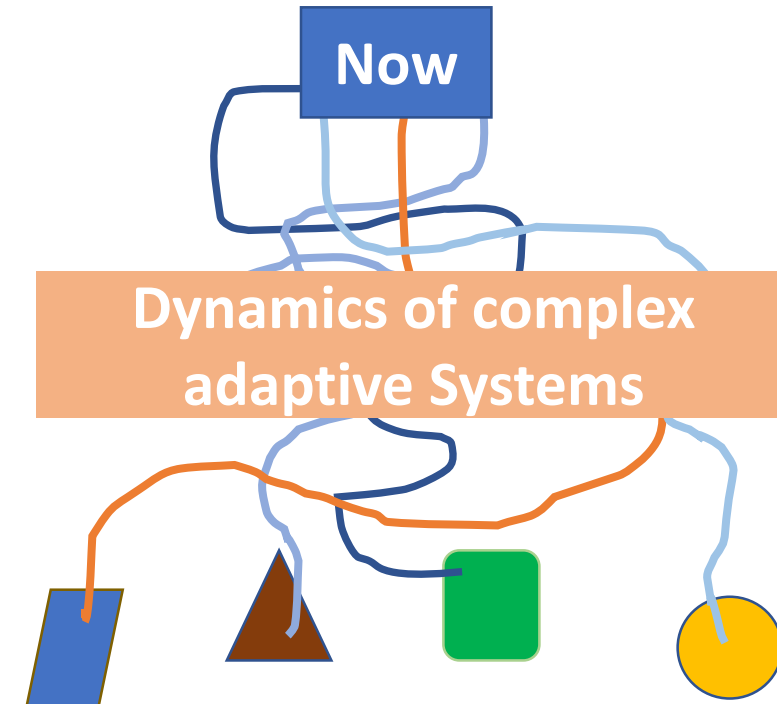

**Information**

**Bias**

**Frames**

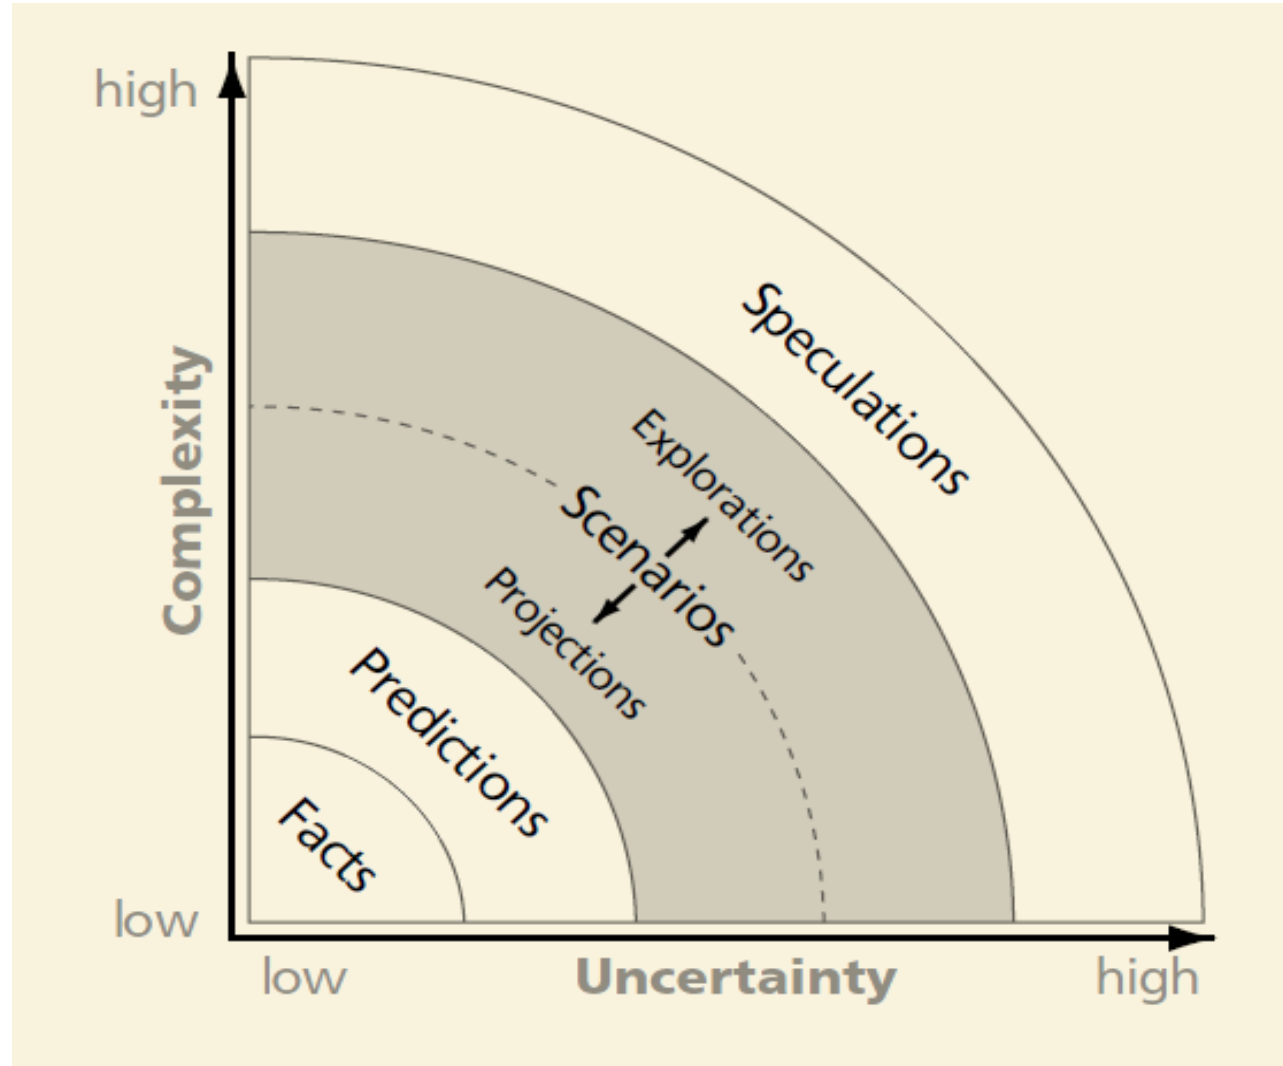

**"real" world  
of socio-ecological interactions**

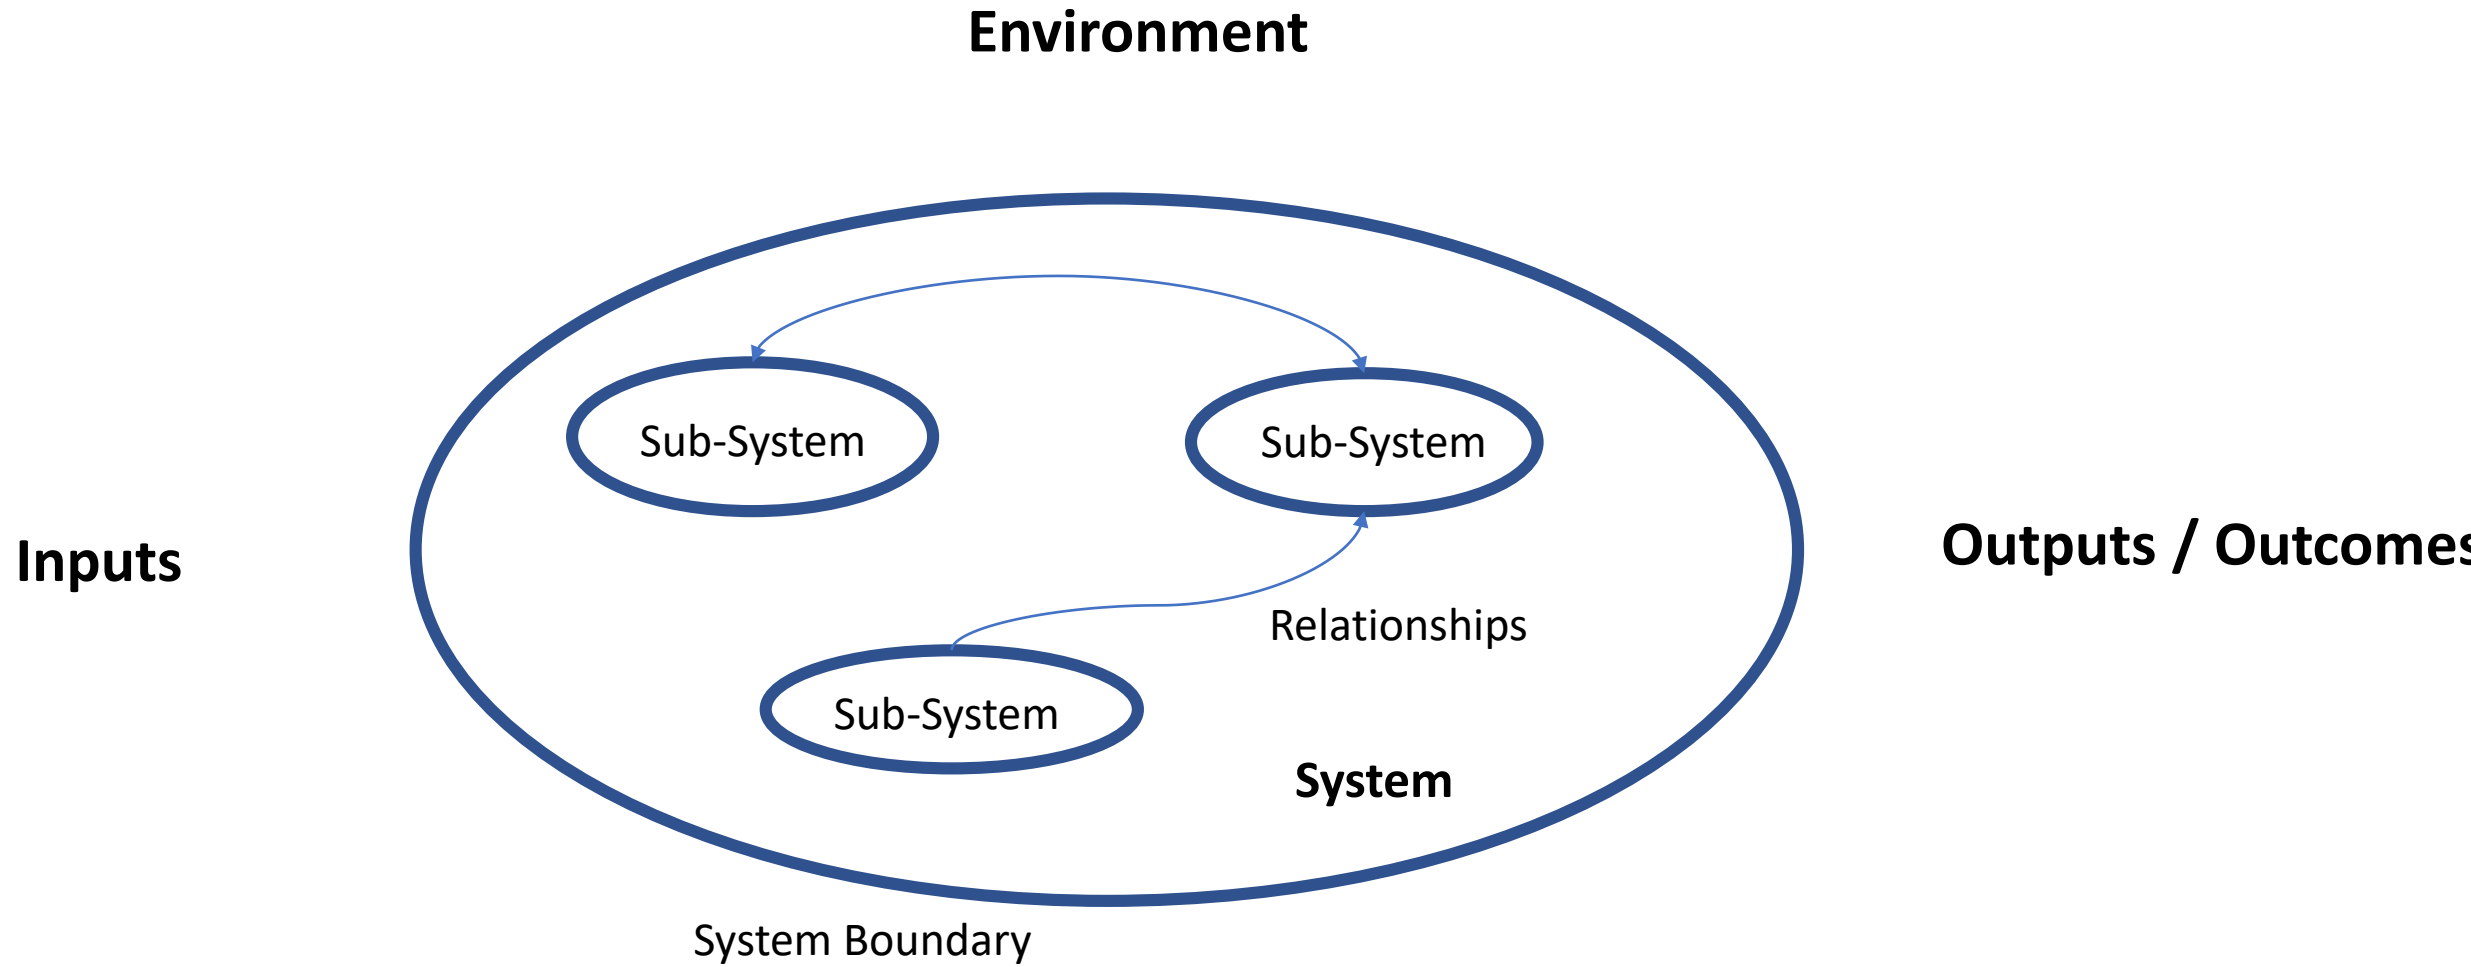

**Future – different scenarios**

# An initial framing

# Understanding the System

# Drivers, Trends and Uncertainties - Examples

Identifying the key drivers that influence the food system, their associated trends and patterns, and the main uncertainties are crucial before undertaking a scenario development process. This can be done through a consultative stakeholder process (see SUSFANS example above).

## Drivers

1. Consumption
2. Technology
3. Markets
4. Climate and Environment
5. Policy and Geopolitics

## Trends

1. Increasing population
2. Increasing urbanization,
3. Worsening climate change
4. Increasing resource scarcity
5. Accelerating technological change
6. Increasing market connectivity

## Uncertainties

1. Pace of Market Growth
2. Effects of climate change
3. Shifting demand of food
4. Disruptive technologies
5. Migration
6. Social and economic change

# Drivers, Trends and Uncertainties

## “Stream Trains”

Easily perceived drivers and trends that will influence change - direct and indirect

## “Black Swans”

Rare and/or unpredictable events that have a big impact

# Risks and Opportunities

Systemic  
Risks

Transformational  
Opportunities

	<b>Steam Trains</b>	<b>Black Swans</b>
<b>Systemic Risks</b>	<b>Obesity Biodiversity loss</b>	<b>Disease outbreaks Trade regimes ?</b>
<b>Transformational opportunities</b>	<b>ICT for inclusive banking Genetic engineering</b>	<b>Unforeseen technology Sudden social or political change</b>

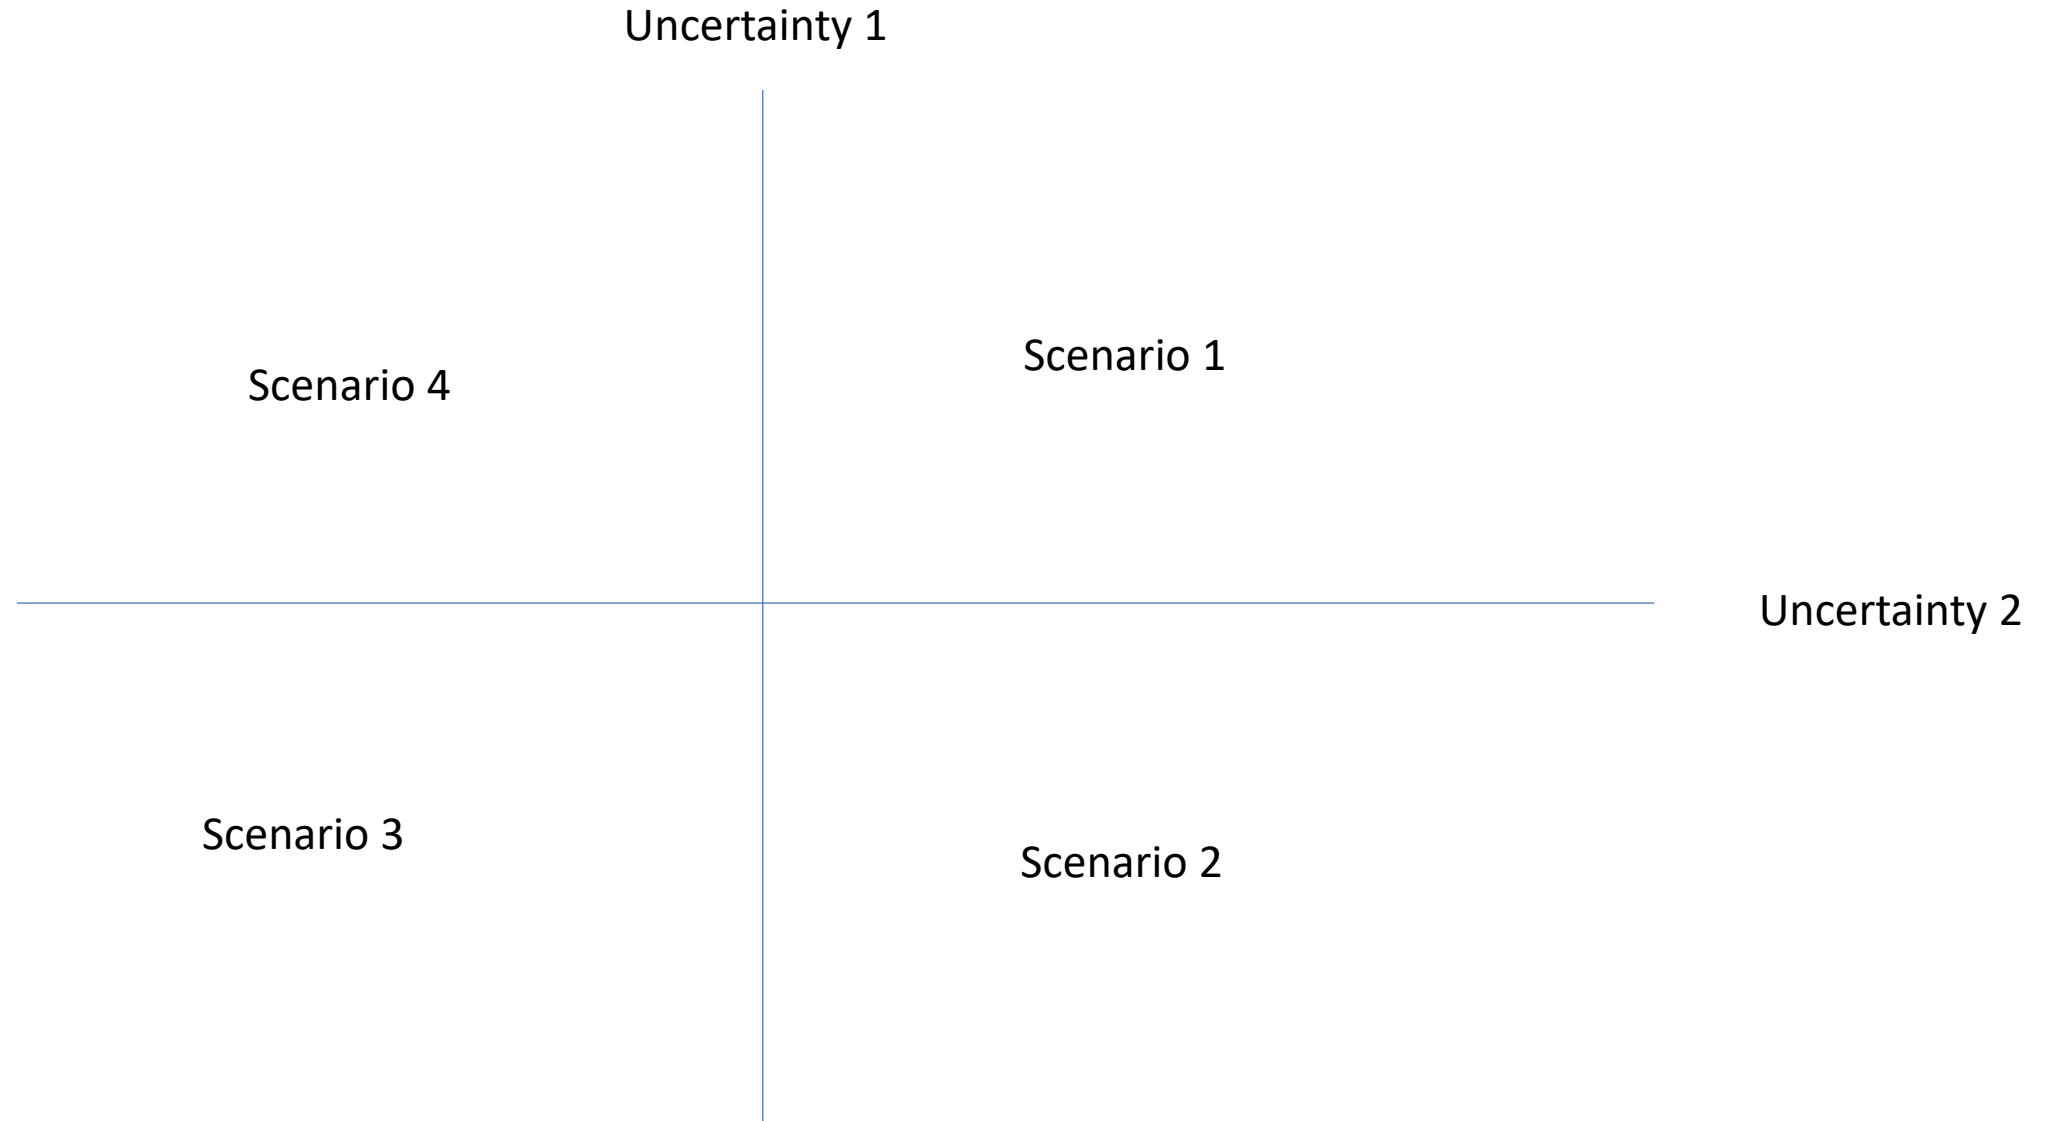

A description of how the future may unfold according to an explicit, coherent and internally consistent set of assumptions about key relationships and driving forces.

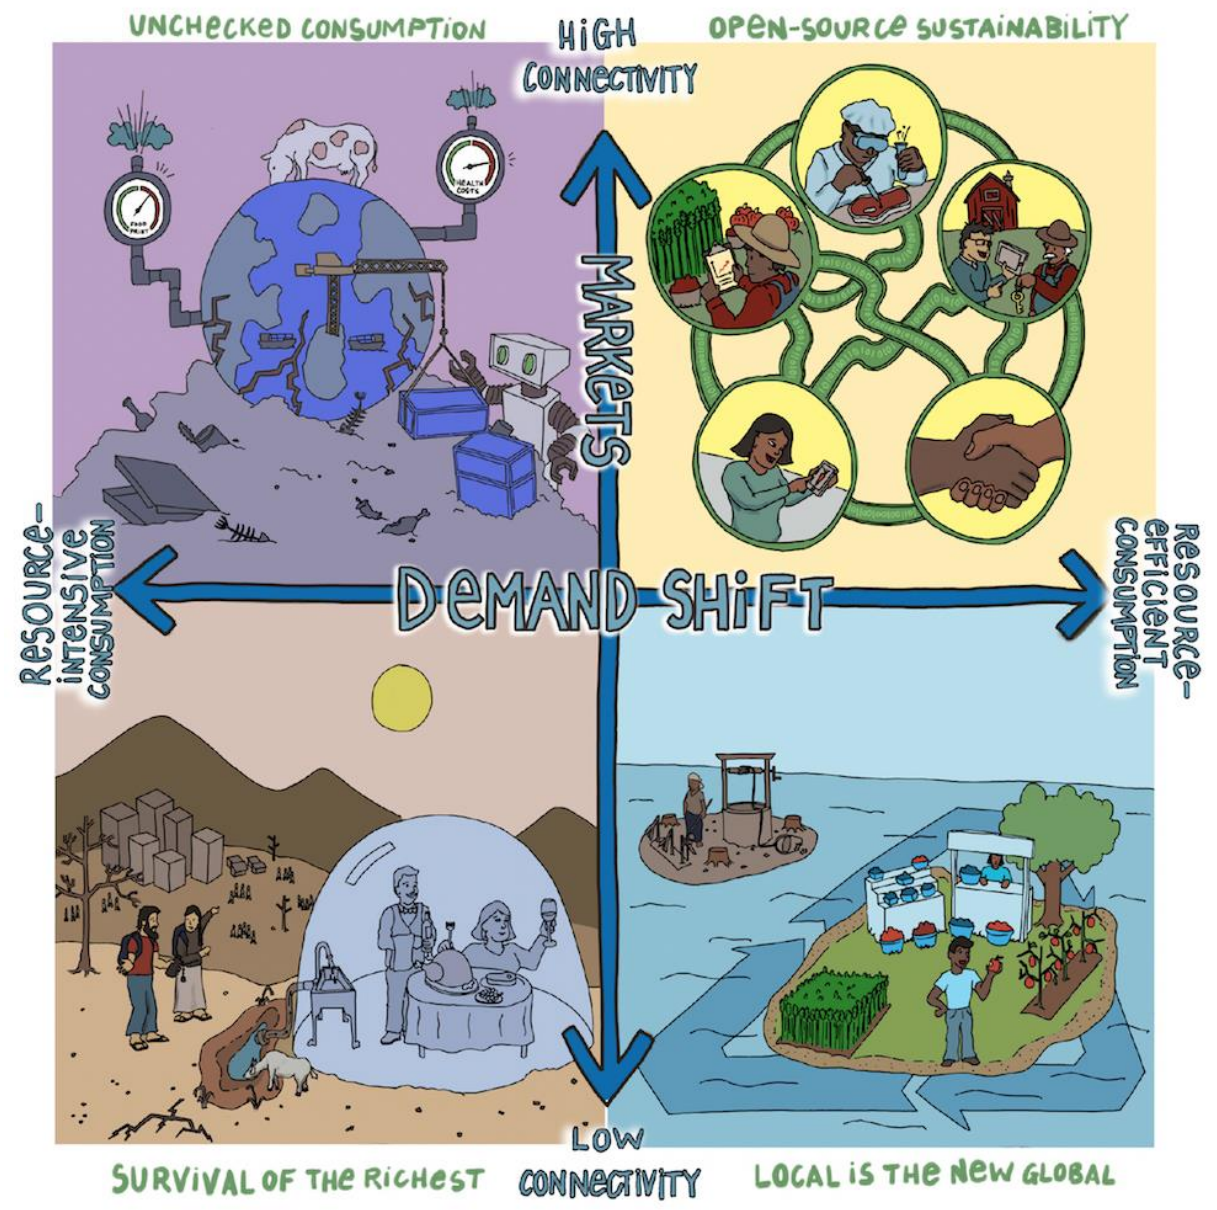

## Types of scenarios

- Predictive
- Explorative
- Normative
  
- (Backcasting)

# Scenarios – a common approach

# Example of Scenarios

# Different ways of mapping scenarios

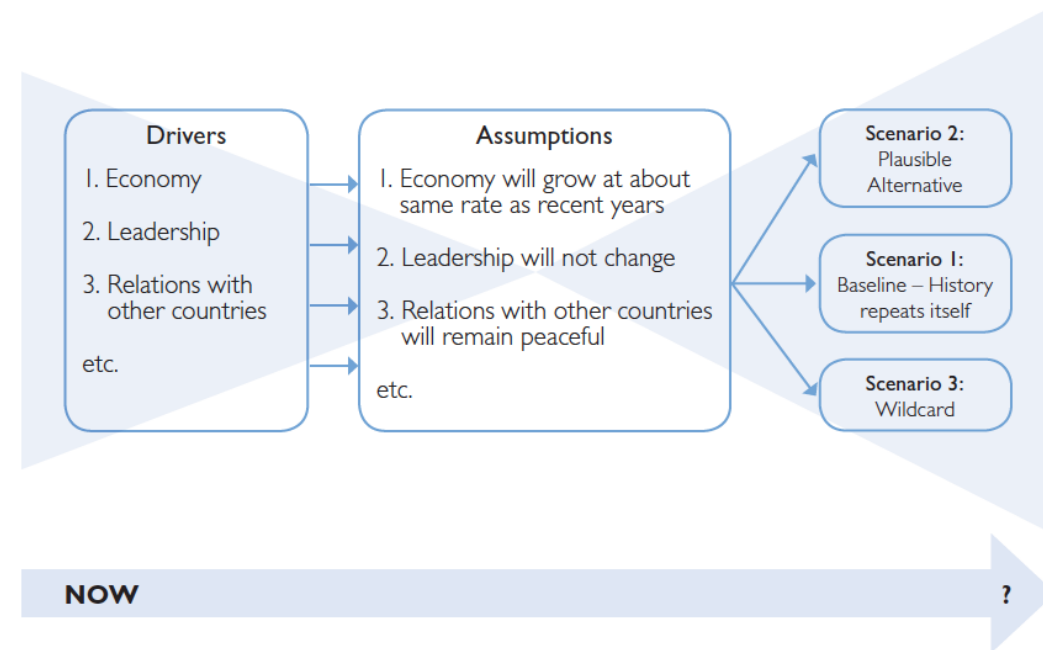

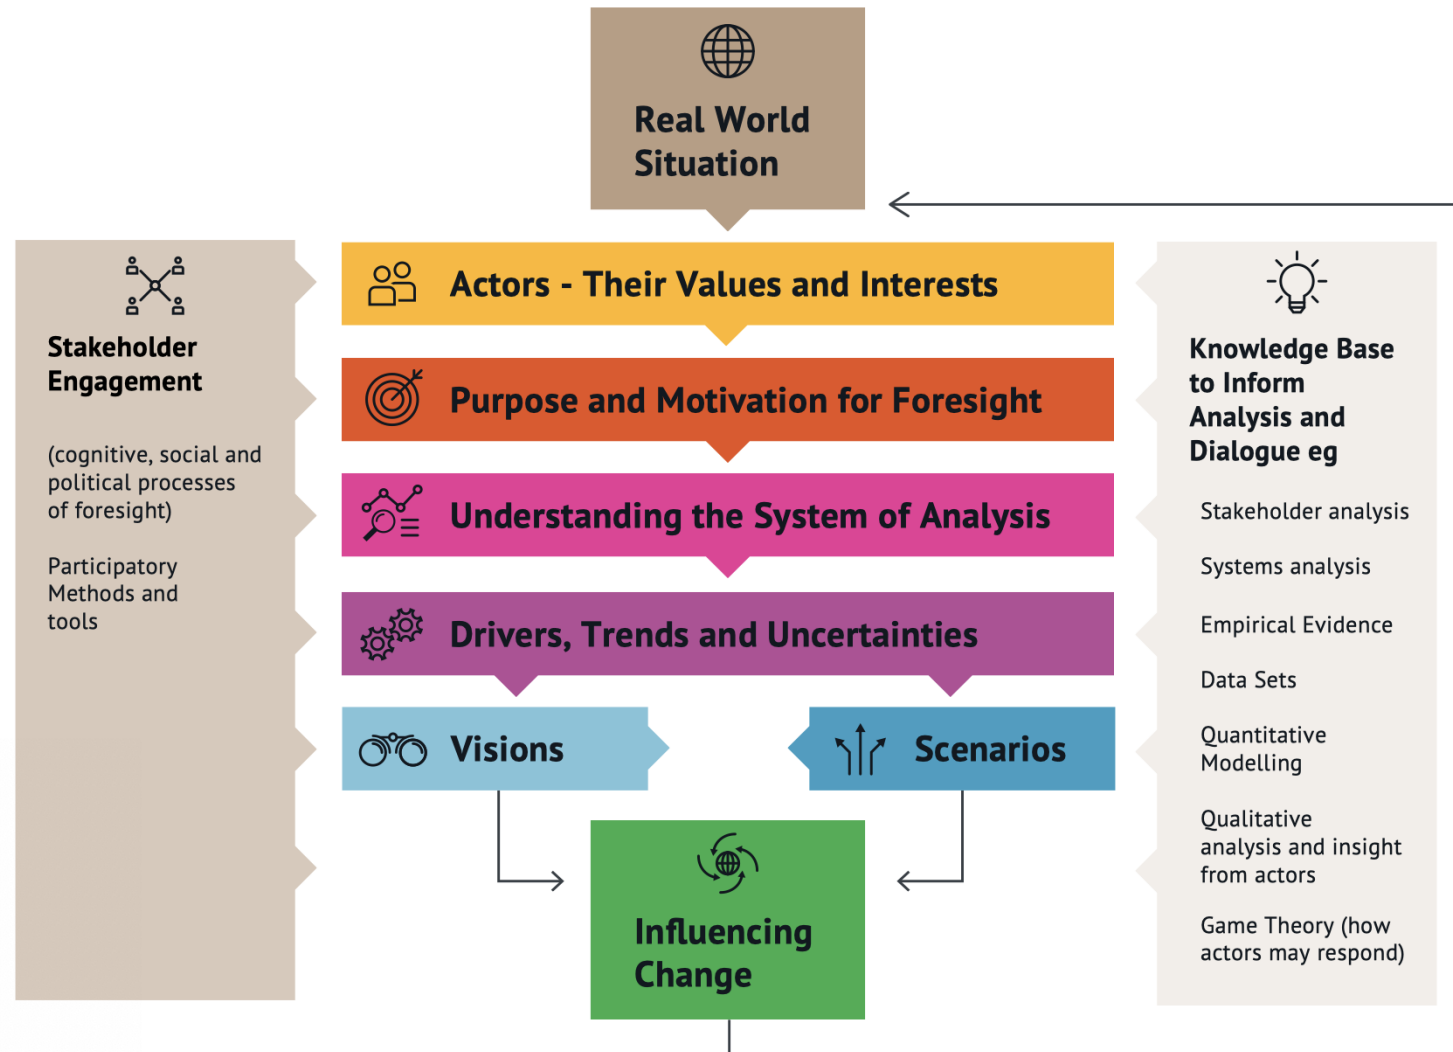

Figure 3: India in 2020

# Influencing Change (Theories of change)

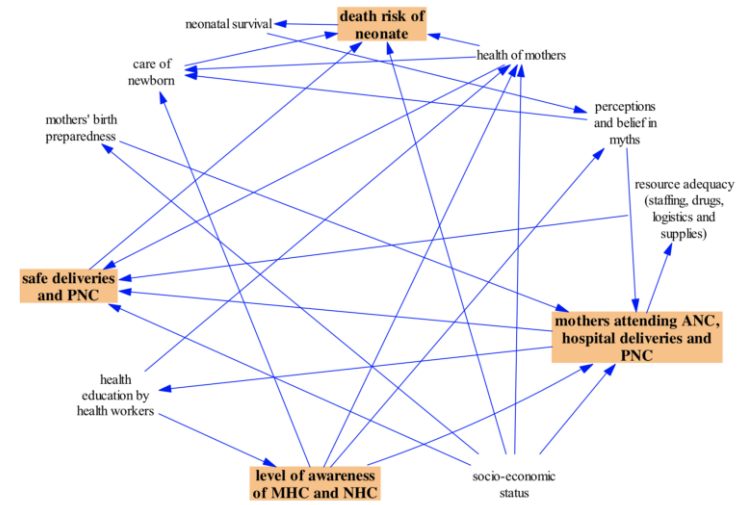

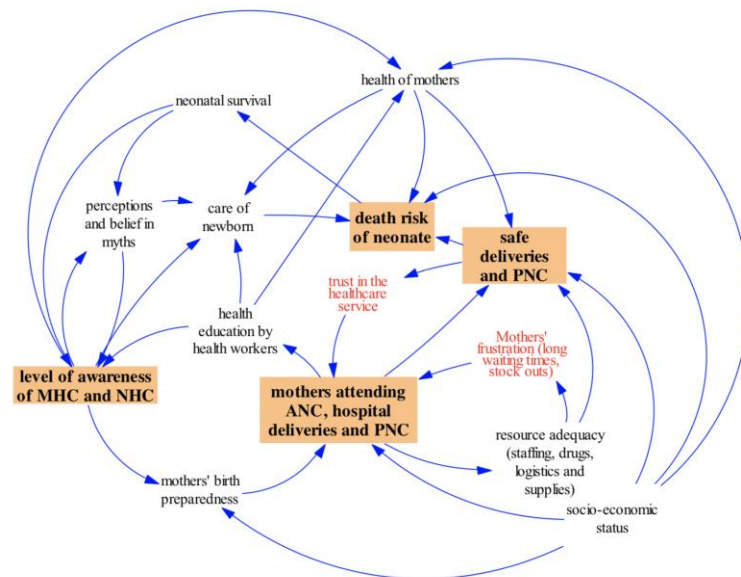

# Foresight Framework

# Systems Mapping

# Rich picture

- A drawing of a situation that illustrates the main elements and relationships that need to be considered in trying to intervene to create some improvement.
- A rich picture helps us to understand the complexity of an entire situation. It is a way of thinking holistically. A rich picture helps us to see relationships and connections that we may otherwise miss.
- It is called a rich picture because it illustrates the richness and complexity of a situation.

# Example of a rich picture

# Tips

Be creative

Use symbols, icons and pictures as much as is possible

Focus on illustrating the relationships between different factors/stakeholders/scales

Focus on the 'big picture' and don't get lost in the details of just one element

Encourage everyone to draw and add their ideas

Make use of the 'artists' in the group as well

# Instructions

## Step One – Rich picture

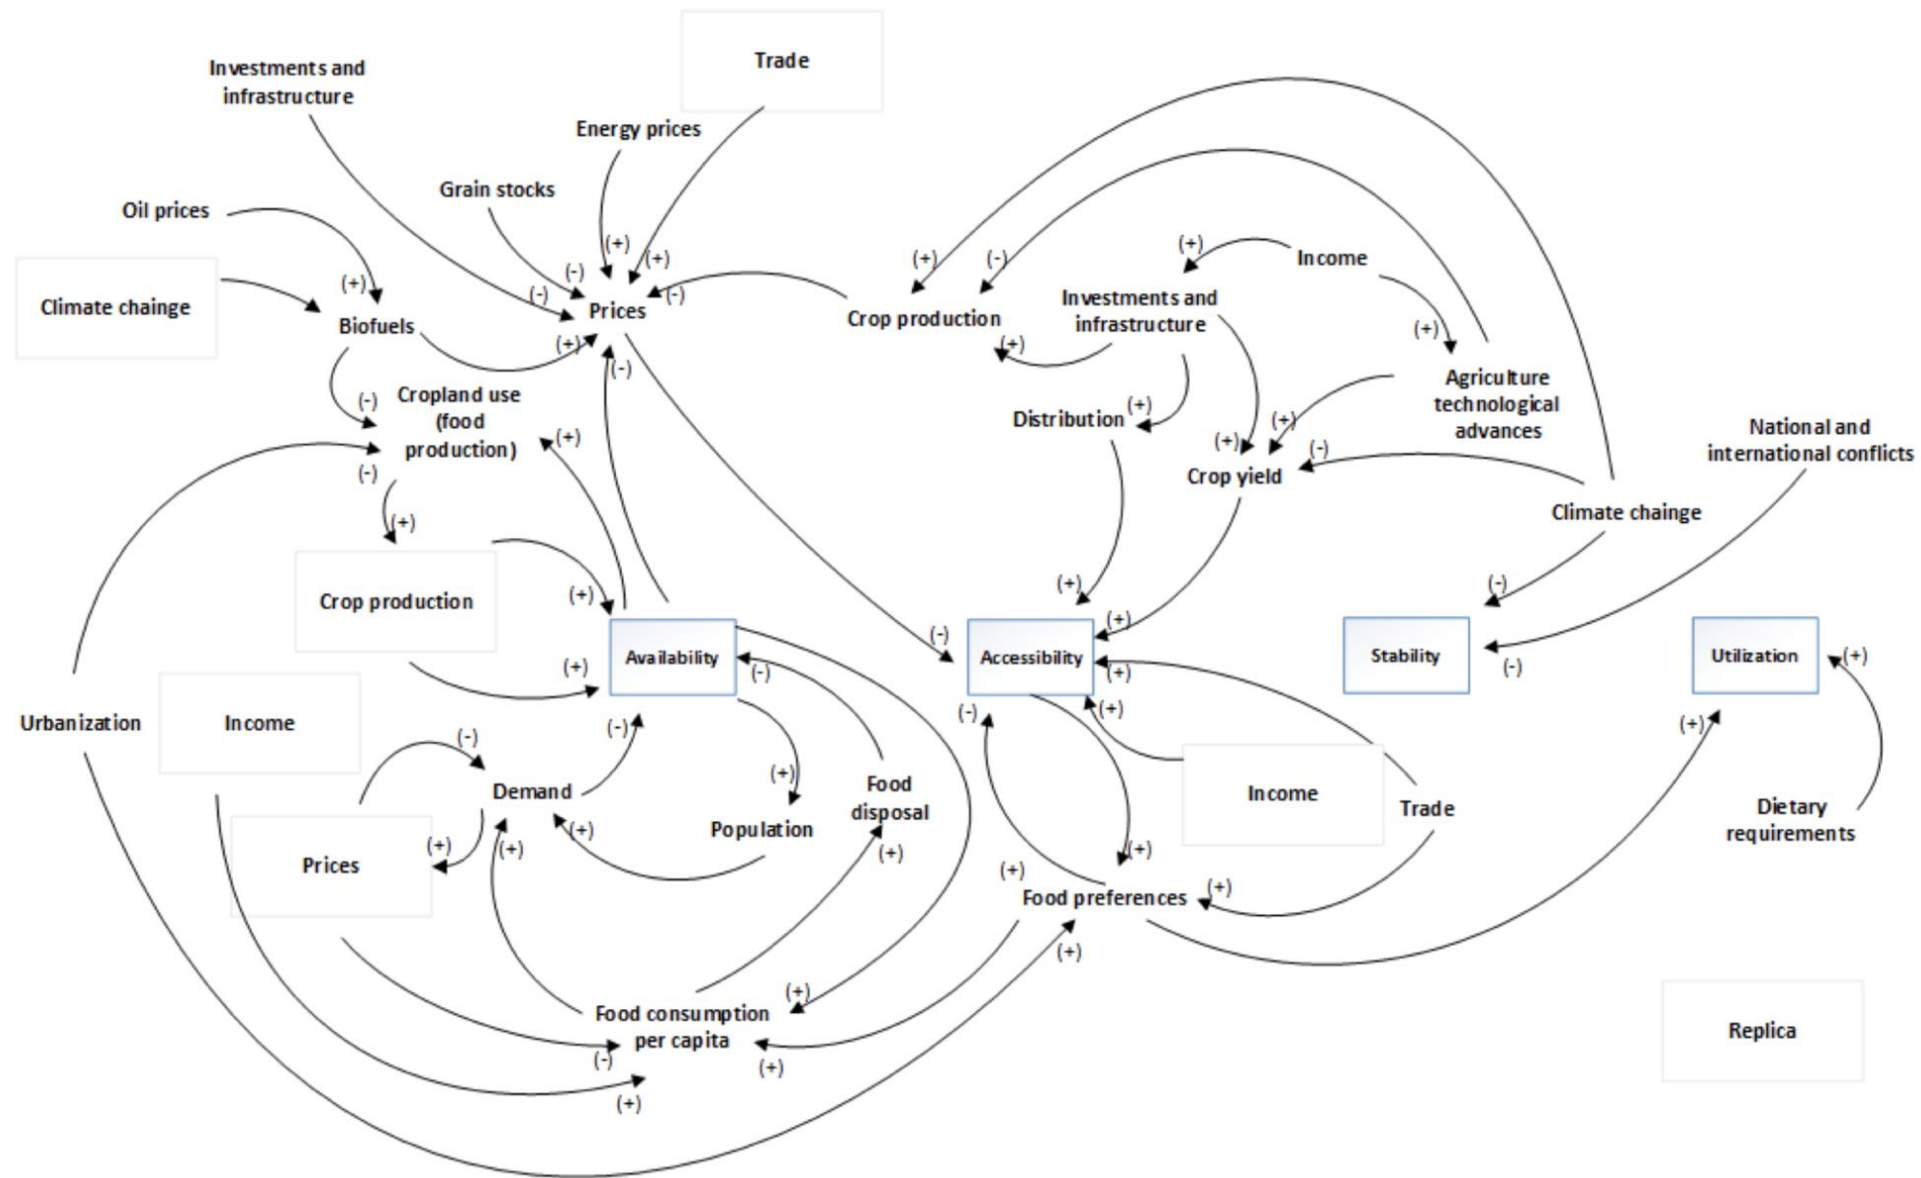

- Draw a geographic boundary and key features
- Add key features and actors in the food system
- Add relationships and flows with the wider environment
- Identify key relationships in the system and how these are changing
- Consider institutional factors
  - Governance mechanisms
  - Policies
  - Laws
- Think about power structures
  
- About 50 Minutes

## Step Two – Trends and Uncertainties

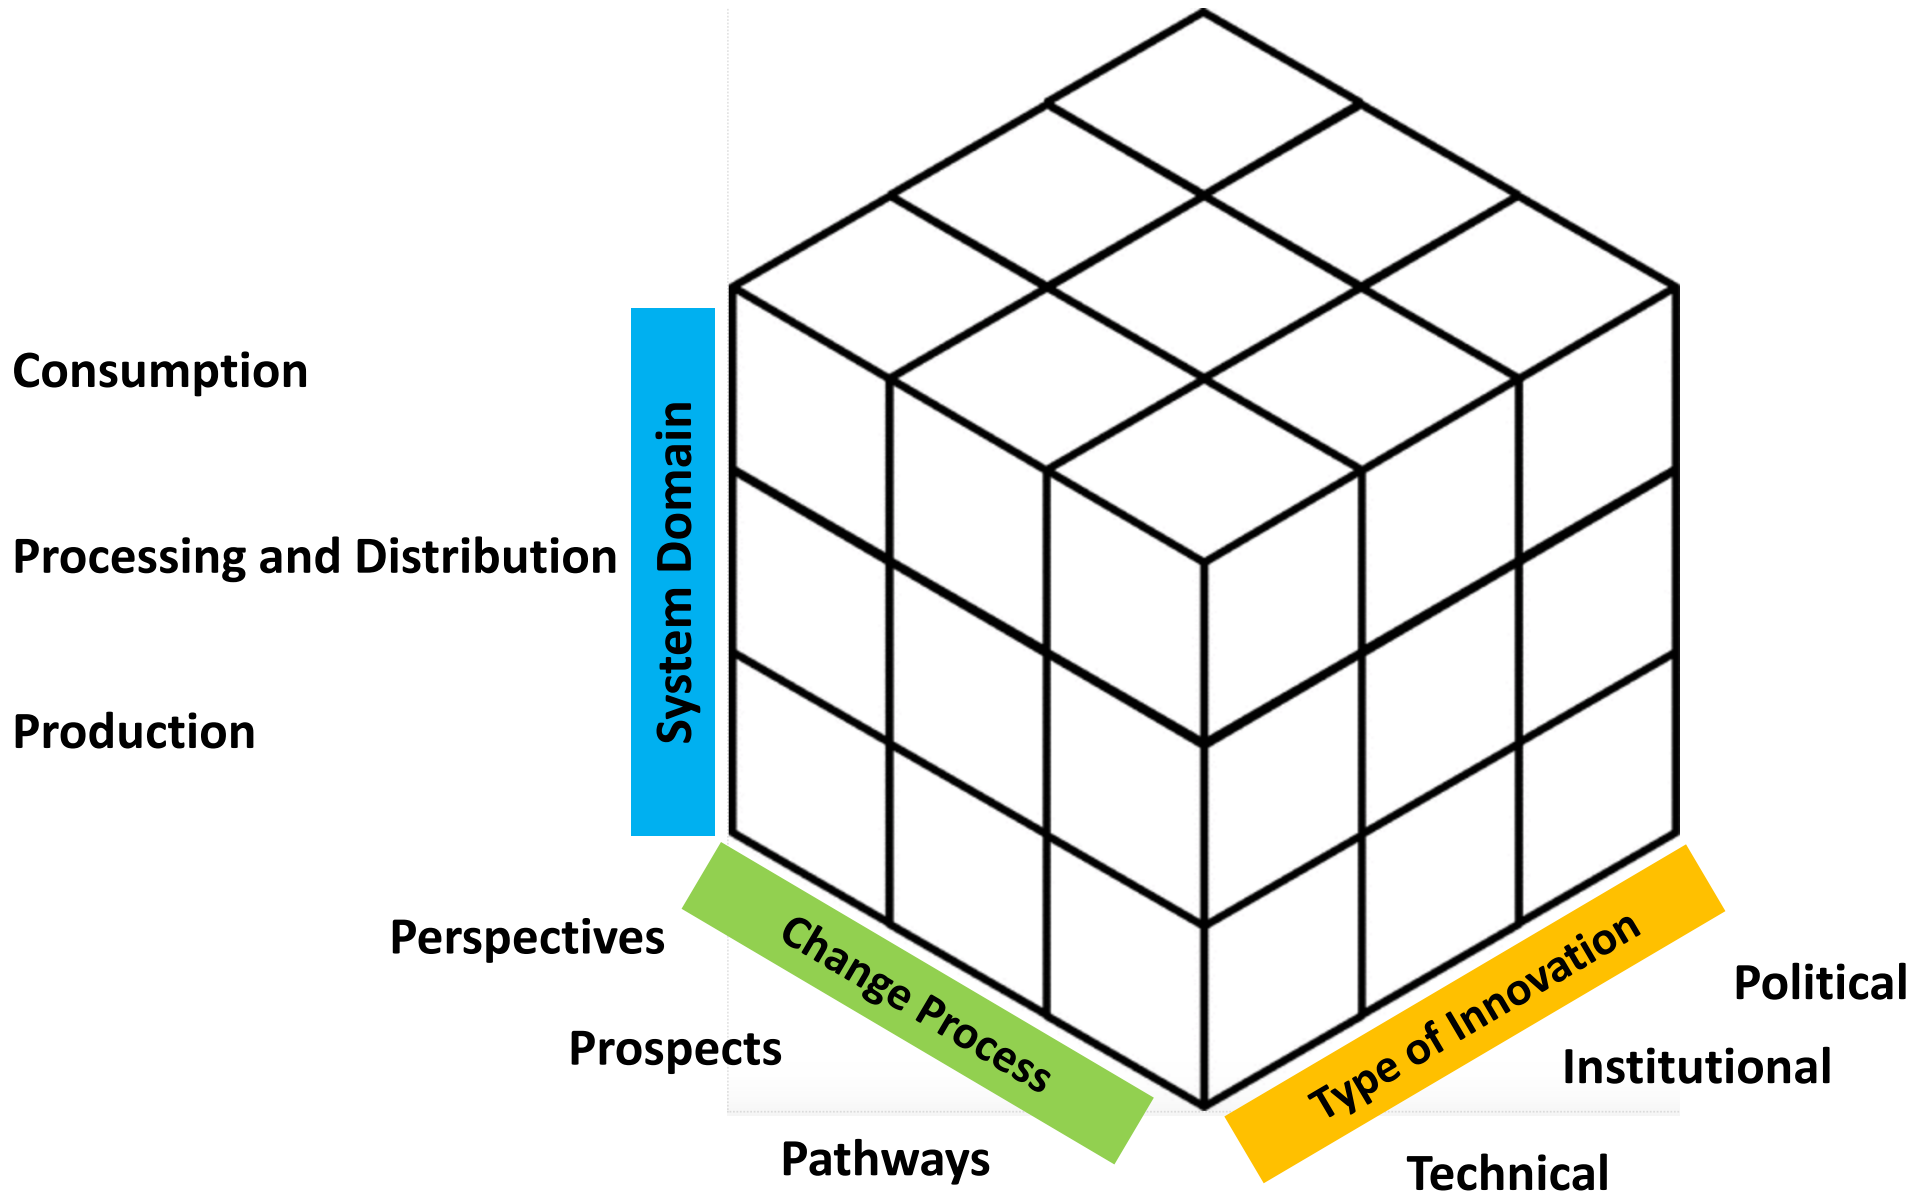

- Identify as many important trends as you can and write these on sticky notes and put on a flipchart
  - Connect them to your picture with a number
- Identify as many important uncertainties as you can and write these on sticky notes and put on a flipchart
  
- About 45 minutes

# AgriFood Transformation – a rubics cube!

## Pathways to Diversification

Diversifying agriculture in the Eastern Gangetic to support sustainable, inclusive and resilient food systems

*Foresight and scenarios for innovation and change towards 2050*

Technical Prospects

Focus – impacts of:

- WEF interactions
- Role of Gender
- Migration
- Trade

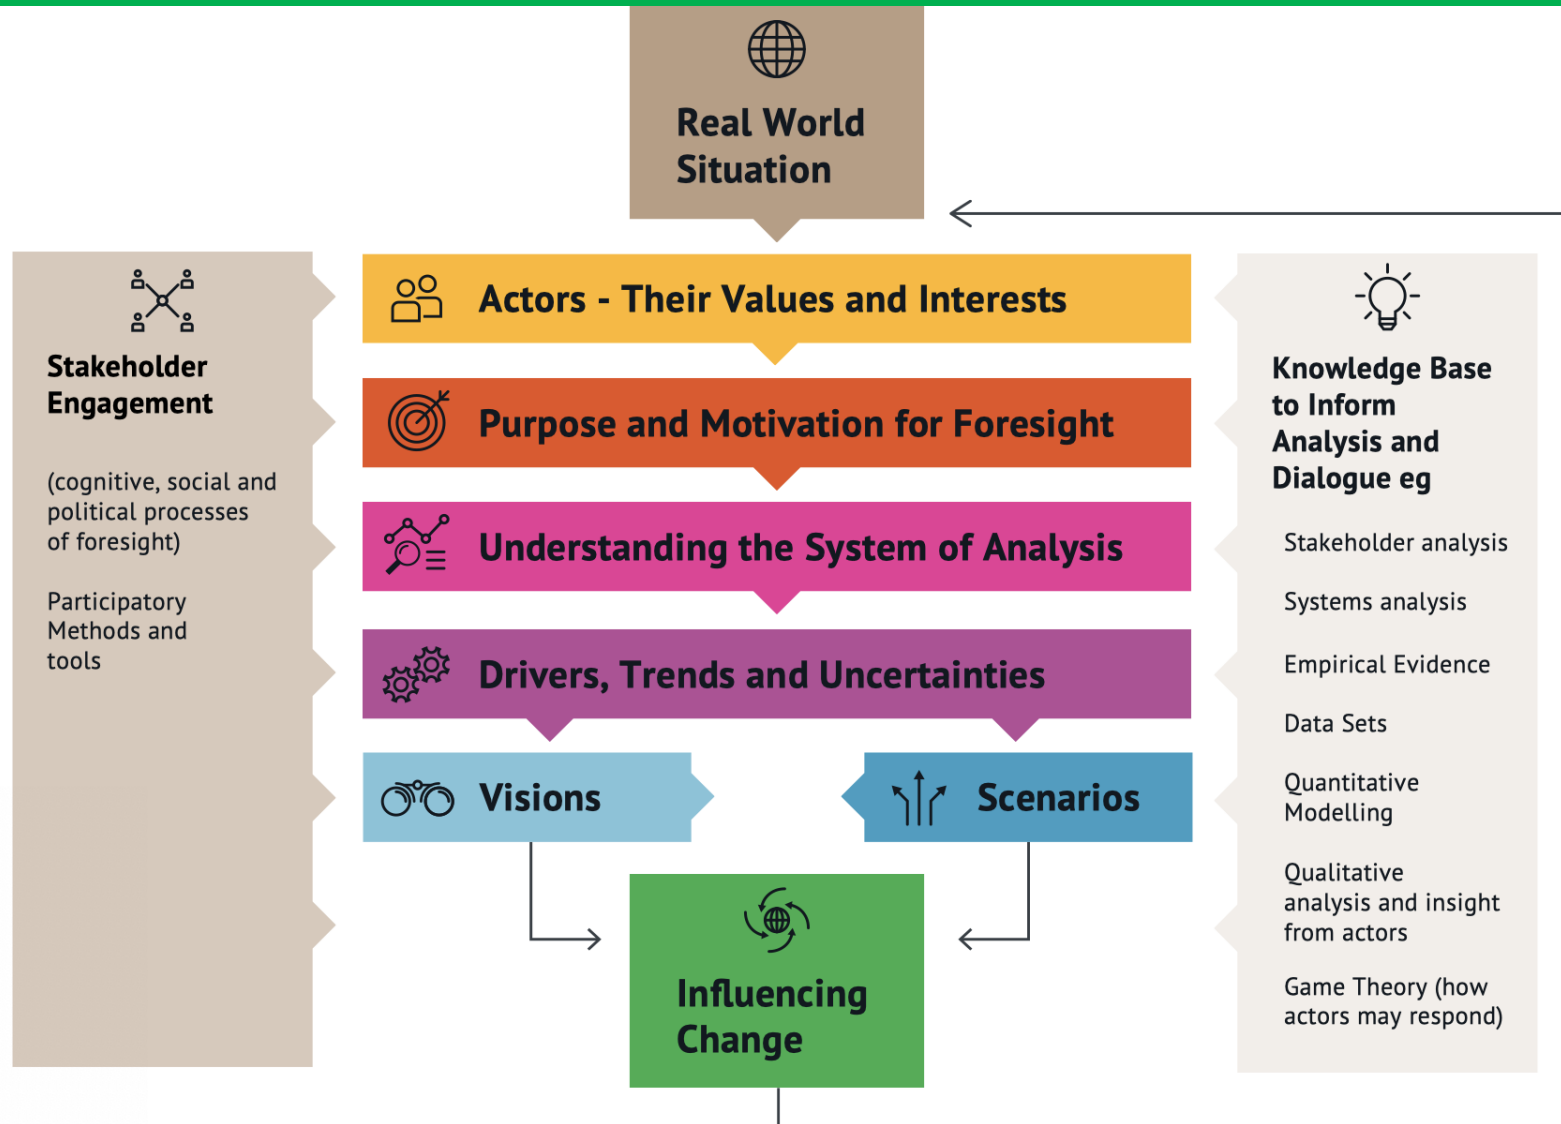

# Influencing Change (Theories of change)

# Group Instructions

- Develop a pitch for running foresight and scenario work in your location
  - Why is this needed
  - What would be the key elements
  - How could it be organized
- What would be the content focus of the work
- What could/would be the contribution to longer term change processes
- Who would you be trying to engage and why?
  - Who
  - What scale
  - How
- What analysis would be needed
- What would be your engagement strategy
  - Who
  - How
  - What scale

# Foresight Framework

# Scenario

Scenario 1: Crocodile lunch

Scenario 2: Lucky escape

Scenario 3: Smooth ride

Scenario 4: unseen dead end

A description of how the future may unfold according to an explicit, coherent and internally consistent set of assumptions about key relationships and driving forces.
